

NATIONAL FOREST GARDENING SCHEME

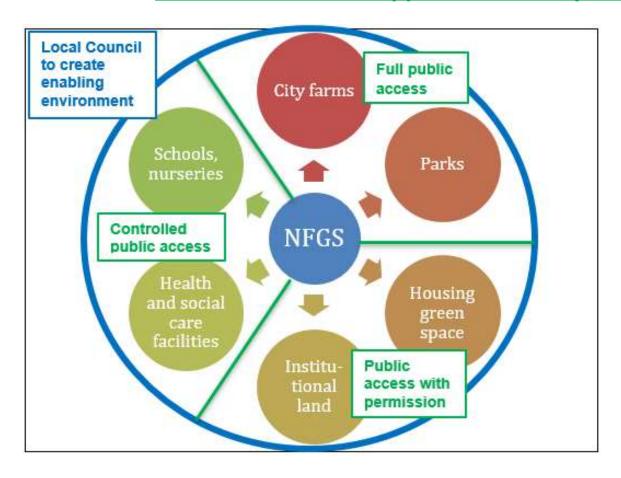

PAUL PIVCEVIC FOUNDER AND DIRECTOR

NATIONAL FOREST GARDENING SCHEME

- First gathering December 2016
- Focused on forest gardens in publicly accessible spaces
- 150 + members
- Incorporated as a community interest company 2019

NFGS - WHERE - to support community forest gardening

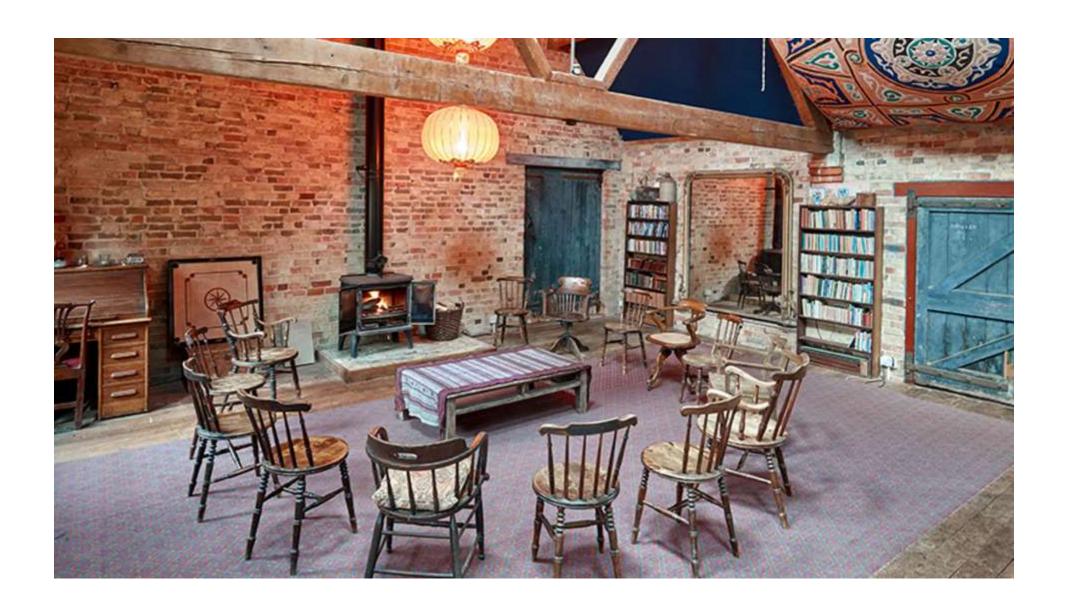

Common land/ ownership types categorised by degree of access

Each type has its own set of opportunities and challenges

The NFGS seeks to bring its members expertise to support development of FG in these spaces

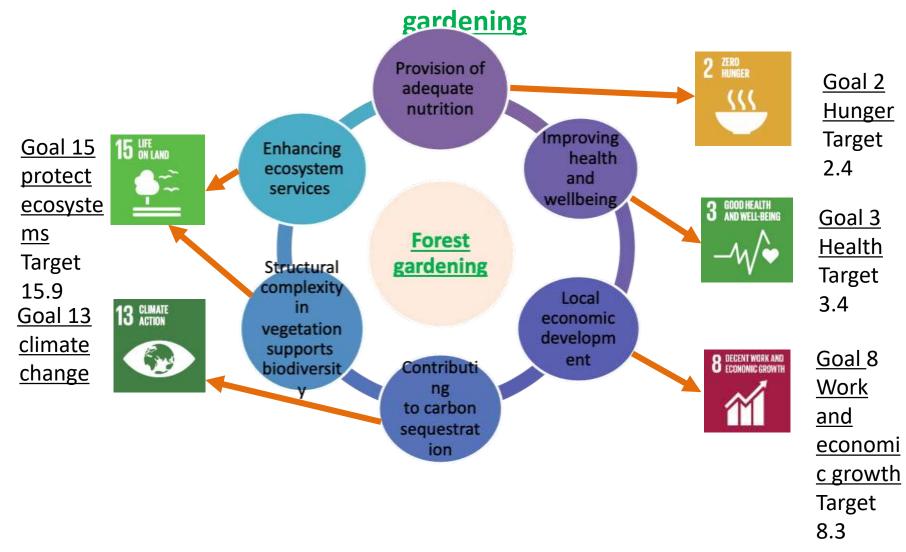

NFGS - WHAT - climate resilience through community forest

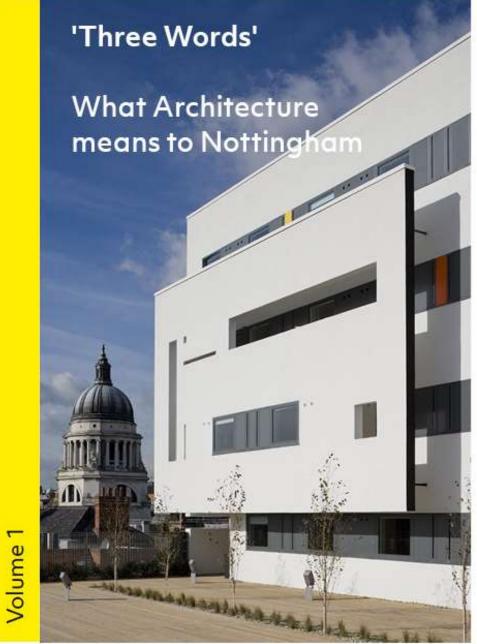

Find your nearest community forest garden:

National Forest Gardening Scheme

@NatForestGarden

Our aim is to bring us individually, and in our communities to a new level of harmony and well being through planting, eating from, and enjoying Forest Gardens.

Herbaceous retrofit

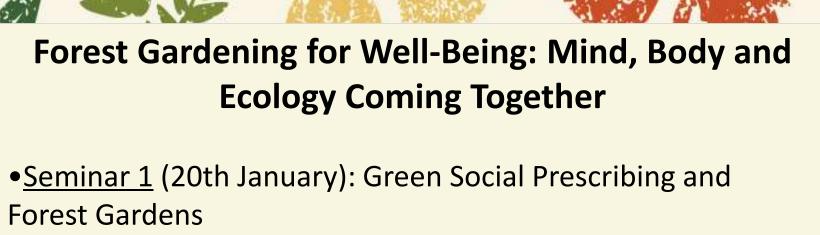

3 x 3m plot

Balcony or garden container

- •<u>Seminar 2</u> (27th January): Healthy' health environments: using land in healthcare facilities for forest gardens and wellbeing.
- •<u>Seminar 3</u> (3rd February): Designing and Delivering Forest Gardens for Well-Being
- •<u>Seminar 4</u> (10th February): Open discussion building on themes drawn out from previous seminars.
- •Seminars are free and will be 19.30-21.00 on the indicated dates. We would be delighted if you were able to join us.

POTENTIAL OF THIS MOVEMENT

- **Relational, co-creative** nature of these gardens redefines the place of the gardener/volunteer
- Research that shows a wellbeing gain through engaging in this way
- Community resilience
- The **popularising** of more resilient perennial plants contributing to food resilience
- Encouraging commercial market gardening of perennial plants
- Therefore strengthening local food economies
- Framing forest gardening as bringing nature-based solutions to your own community and back gardens
- Positioning community forest gardening as repairing and enhancing soils – direct link to changes in farming practices
